EU Crisis Management After Lisbon-Nicoletta Pirozzi 2015 This book analyzes the approach of the European Union to crisis management after the entry into force of the Lisbon Treaty, and it assesses the EU's suitability for addressing current and future security threats. The book primarily provides a framework of analysis with which to interpret current EU crisis management, as both a product of the innovations of the Lisbon Treaty and its interaction with the international security environment. It also offers a comprehensive and in-depth examination of the post-Lisbon crisis management system, in terms of concepts, structures, process, and capabilities. A reality check of this system is conducted by analyzing a number of case studies in which the EU recently carried out a crisis management role: the civilian missions EUCAP Sahel Niger, EUCAP Nestor, and EUAVSEC South Sudan, as well as the military operation EUTM Mali. This analysis

sheds light on the modalities selected by the EU for intervening in crisis situations, the impact that its interventions have produced, and the lessons that the EU has learned from these experiences. The book points out the structural strengths and weaknesses in the EU's approach to and implementation of crisis management, and it shows how they impact the EU's ability to cope with future crises. It fills a gap in the existing literature and, at the same time, provides decision makers with policy recommendations for improving the EU's performance in this field. \*\*\* "This is an important piece of research on the theory and practice of 'crisis management' as carried out by the European Union. The book constitutes a significant contribution to understanding the doctrine, the institutions and the actual policies that underpin the Union's external action. Its comprehensive and forward-looking approach ensures that both scholars and practitioners will find it an indispensable tool to rely upon in the future." -- Dr. Antonio Missiroli, Director of the European Union Inst. for Security Studies [Subject: EU Law]

Decoding the Enigma-Robert Chell 2006-08-01 Finally-a strategic guide for men about menopause! When it comes to this confusing time in a woman's life, men around the globe continually ask the following questions: what is menopause, who is this menopausal woman, how long does this menopause "thing" last, and most importantly, what strategies can a male use to deal with these issues? Decoding the Enigma: His Guide to Her Menopause provides clear answers to these questions-and many more-from a nonmedical perspective by offering manageable approaches that can be implemented throughout the menopausal process. Psychologists Robert M. Chell, PhD, and Jane Cooper, MA, dispel commonly-held myths about menopause, including the myth that menopause begins during middle age. Many women in their midthirties begin the process known as

perimenopause, the first phase of menopause. Therefore, menopause is not the sole dominion of the aging matron. Women experience menopause differently. There are some who are symptom-free and others who suffer a myriad of physiological and psychological reactions. Decoding the Enigma provides strategies for men that are specific to and consistent with the unique temperament and orientations of the women in their lives.

Pasaporte-Malia LeMond 2008-08 "Pasaporte" is a conversation-based review text designed for advanced beginning students who need a

refresher course before enrolling in second-year Spanish. Courses for this population of students have always presented a myriad of challenges to instructors. In addition to dealing with the disparate knowledge base of students at this level and the time lapse since the last Spanish course taken, we are faced with teaching a year's worth of material in one semester. With so many grammar points to cover, instructors often feel compelled to give short shrift to communicative activities and culture. This rapid treatment of so many linguistic structures leaves students with little opportunity to practice, recycle, and synthesize basic grammar and vocabulary or for communicative activities set in an authentic cultural context. As we formulated the scope and sequence for "Pasaporte," we considered what intermediate students should be able to do when they begin second-year Spanish. Ideally, we would like them to be able to describe and compare people and places; narrate in the present, past and future; talk about likes and dislikes; react and recommend; and begin to recognize how a hypothesis is expressed. With

these goals in mind, we determined that the communicative functions would be presented in the context of a Global Opportunities Fair that encourages discussion about real-life opportunities such as study abroad, internships, cultural exchanges, and volunteer work in which the Spanish language would be an obvious asset. The Book of Our Heritage-Eliyahu Ki Tov 1997 Explores the Jewish year with great depth, sensitivity, and insight. Laws, customs and practices are all noted and explained, along with the words of our Sages in a wealth of Midrashic commentary.

COBOL for Students-Andrew Parkin 1975 Transgenerational Entrepreneurship-M. Nordqvist 2010-01-01 Introducing a new concept in family businesses Transgenerational Entrepreneurship addresses how these businesses achieve growth and longevity through entrepreneurial activities. It focuses on the resources, capabilities and mindsets that families develop and draw upon in order to be entrepreneurial across generations, and presents findings from an international research

collaboration between family business researchers and practitioners. In addition to a comprehensive conceptual chapter, the editors include a unique set of empirical case-based research papers that investigates transgenerational entrepreneurship in different European contexts. They bring together and integrate frontier research on entrepreneurship and family business, as well as provide a basis for future research. Academics, teachers and students in business and management, entrepreneurship and family business will find this path-breaking book of value, as will libraries, policy makers and consultants.

Energy Efficiency in Housing Management-Nico Nieboer 2012-07-26 The embedding of energy efficiency in the management of individual housing organisations is crucial for the realization of current ambitious energy efficiency policies. This issue is examined for the first time in this book through an analysis of selected case studies in new 'green' buildings, as well as in the retrofitting of existing housing, maintenance and budgeting. The links between policy ambitions, practice and housing management institutions are given particular attention. Thus the book is primarily concerned with how ambitions about energy efficiency are carried forward in investment decisions at the housing estate level. Technical and financial issues relevant for this are also addressed. The editors combine a wealth of experience in comparative research on housing policy and housing management with a strong academic background in housing studies and economics. The book aims to be internationally comparative including a range of

countries. A chapter will be devoted to each of the following countries:- Sweden; Denmark; Germany; the Netherlands; England; France; Switzerland; Austria; Czech Republic; Slovenia; Canada. The book will appeal to a large audience of students and academics who are concerned with housing issues, urban policy and politics as well as to those engaged in research in energy efficiency policies in the built environment.

Bilingual First Language Acquisition-Jürgen M. Meisel 1994-09-06 The contributions in this volume are based on an analysis of data from bilingual children acquiring French and German simultaneously. The longitudinal studies started at approximately age one year and six months and continued till age six. The papers focus on the development of specific grammatical phenomena; explanations are given within the framework of the Principle and Parameter approach. The study is primarily concerned with the acquisition of so-called 'functional categories' and the consequences of their acquisition for the development of grammar. Specific points dealt with in these papers include: gender, number

and case and their internal structure (DP vs NP); inflection and its consequences for agreement marking; and word order phenomena (subject-raising constructions (incl. passives), word order in subordinate clauses). The basic hypothesis underlying this study is that early child grammars consist only of lexical categories and that functional categories are implemented later in the child's grammar. How this happens exactly is the central issue explored in this book.

Erotic Interludes-Lonnie Barbach 1995-06-01 The stories in this anthology brilliantly capture the myriad layers, colors, and visions of every woman's sexuality. Whether they tell of women young or old, married or single, heterosexual or lesbian, each story is told by a woman from the woman's viewpoint, celebrating feminine sensuality and reaffirming every woman's right to the pleasures and adventures of sex.

Multivariable Calculus with Applications-Peter D. Lax 2018-03-12 This text in multivariable calculus fosters comprehension through meaningful explanations. Written with students in mathematics, the physical sciences, and

engineering in mind, it extends concepts from single variable calculus such as derivative, integral, and important theorems to partial derivatives, multiple integrals, Stokes' and divergence theorems. Students with a background in single variable calculus are guided through a variety of problem solving techniques and practice problems. Examples from the physical sciences are utilized to highlight the essential relationship between calculus and modern science. The symbiotic relationship between science and mathematics is shown by deriving and discussing several conservation laws, and vector calculus is utilized to describe a number of physical theories via partial differential equations. Students will learn that mathematics is the language that enables scientific ideas to be precisely formulated and that science is a source for the development of mathematics.

Experience and Meaning in Music Performance-  
Martin Clayton 2013-10-31 How does the immediate experience of musical sound relate to processes of meaning construction and discursive mediation? This question lies at the heart of the studies presented in Experience and Meaning in Music Performance, a unique multi-authored work that both draws on and contributes to current debates in a wide range of disciplines, including ethnomusicology, musicology, psychology, and cognitive science. Addressing a wide range of musical practices from Indian raga and Afro-Brazilian Congado rituals to jazz, rock, and Canadian aboriginal fiddling, the coherence of this study is underpinned by its three main themes: experience, meaning, and performance. Central to all of the studies are moments of

performance: those junctures when sound and meaning are actually produced. Experience-what people do, and what they feel, while engaging in music-is equally important. And considered alongside these is meaning: what people put into a performance, what they (and others) get out of it, and, more broadly, how discourses shape performances and experiences of music. In tracing trajectories from moments of musical execution, this volume a novel and productive view of how cultural practice relates to the experience and meaning of musical performance. A model of interdisciplinary study, and including access to an array of audio-visual materials available on an extensive companion website, Experience and Meaning in Music Performance is essential reading for scholars and students of ethnomusicology and music psychology. This Was Hollywood-Carla Valderrama 2020-11-17 In this one-of-a-kind Hollywood history, the creator of Instagram's celebrated @ThisWasHollywood reveals the forgotten past of the film world in a dazzling visual package modeled on the classic fan magazines of

yesteryear. From former screen legends who have faded into obscurity to new revelations about the biggest movie stars, Valderrama unearths the most fascinating little-known tales from the birth of Hollywood through its Golden Age. The shocking fate of the world's first movie star. Clark Gable's secret love child. The film that nearly ended Paul Newman's career. A former child star who, at ninety-three, reveals her #metoo story for the first time. Valderrama unfolds these stories, and many more, in a volume that is by turns riveting, maddening, hilarious, and shocking. Drawing on new interviews, archival research, and an exhaustive library of photographs, This Was Hollywood is a compelling and visually stunning catalogue of the lost history of the movies.

As We Are Now-May Sarton 2014-07-22

Bestselling author “May Sarton has never been better than she is in this beautiful, harrowing novel about being old, unwanted, yet refusing to give up” (The Boston Globe). After seventy-six-year-old Caro Spencer suffers a heart attack, her family sends her to a private retirement home to wait out the rest of her days. Her memory growing fuzzy, Caro decides to keep a journal to document the daily goings-on—her feelings of confinement and boredom; her distrust of the home’s owner, Harriet Hatfield, and her daughter, Rose; her pity for the more incapacitated residents; her resentment of her brother, John, for leaving her alone. The journal entries describe not only her frustrations, but also small moments of beauty—found in a welcome visit from her minister, or in watching a bird in the garden. But as she writes, Caro grows increasingly sensitive to the casual atrocities of retirement-home life. Even as she acknowledges her mind is beginning to fail, she is determined

to fight back against the injustices foisted upon the home’s occupants. This ebook features an extended biography of May Sarton.

Psychoanalysts in Session-Laurent Danon-Boileau 2020-11-24 Psychoanalysis is an intimate clinical experience and the concepts that it explores aim to grapple with the specific phenomena that unfold when a patient speaks and an analyst listens. This book aims to give concrete examples of how these concepts take shape when analysts work. The structure of the contributions presented in this book matches this concern; drawing on a fragment of an analysis, each contribution illustrates how a notion reveals unforeseen perspectives. The list of entries selected is diverse, with notions encountered in international studies since the Second World War prioritised. Certain classical concepts are nonetheless included when their significance has been shaped by the innovative rereading that contemporary authors have made of them. However, not all the entries in this glossary constitute concepts: some correspond to notions, others to intuitions, and even to recurrent

situations with which the analyst is confronted. By grounding, in each entry, the theoretical reflection on a clinical case, the reader is lead towards the incessant to-and-fro process which governs the analyst's reflections from clinical experience to theory. This book therefore constitutes an essential tool for psychologists, psychoanalysts and all professionals in the field of mental care.
