The Original Copy-Roxana Marcoci 2010 Since its birth in the first half of the 19th century, photography has offered extraordinary possibilities of isolating works of art for study and pleasure. The Emotion Code-Dr. Bradley Nelson 2019-05-07 "I believe that the discoveries in this book can change our understanding of how we store emotional experiences and in so doing, change our lives. The Emotion Code has already changed many lives around the world, and it is my hope that millions more will be led to use this simple tool to heal themselves and their loved ones."—Tony Robbins In this newly revised and expanded edition of The Emotion Code, renowned holistic physician and lecturer Dr. Bradley Nelson skillfully lays bare the inner workings of the subconscious mind. He reveals how emotionally-charged events from your past can still be haunting you in the form of "trapped emotions"—emotional energies that literally inhabit your body. These trapped emotions can fester in your life and body, creating pain, malfunction, and eventual disease. They can also extract a heavy mental and emotional toll on you, impacting how you think, the choices that you make, and the level of success and abundance you are able to achieve. Perhaps most damaging of all, trapped emotional energies can gather around your heart, cutting off your ability to give and receive love. The Emotion Code is a powerful and simple way to rid yourself of this unseen baggage. Dr. Nelson's method gives you the tools to identify and release the trapped emotions in your life, eliminating your "emotional baggage," and opening your heart and body to the positive energies of the world. Filled with real-world examples from many years of clinical practice, The Emotion Code is a distinct and authoritative work that has become a classic on self-healing.

Ishiuchi Miyako-Amanda Maddox 2015-10-05 A maverick in the history of photography, Ishiuchi Miyako (b. 1947) burst onto the scene in Tokyo during the mid-1970s, at a time when men dominated the field in Japan. Working prodigiously over the last forty years, she has created an impressive oeuvre and quietly influenced generations of photographers born in the postwar era. Recipient of the prestigious Hasselblad Award in 2014, Ishiuchi ranks as one of the most significant photographers working in Japan today. Spurred by her contentious relationship with her hometown, Yokosuka — site of an important American naval base since 1945 — Ishiuchi chose that city as her first serious photographic subject. Grainy, moody, and deeply personal, these early projects established her career. This choice of subject also defined the beginning of Ishiuchi's extended exploration of the American occupation and the shadows it cast over postwar Japan. Ishiuchi has since addressed the theme of occupation both indirectly — through her photographs of scars, skin, and other markers of time on the human body — and more explicitly, with her images of garments and accessories once owned by victims of the atomic blast in Hiroshima. Essays featured in this volume reveal the past as the wellspring of Ishiuchi's work and the present moment as her principal subject. Ishiuchi Miyako: Postwar Shadows — which includes a selection of more than 100 works — is published on the occasion of an exhibition by the same name, on view at the J. Paul Getty Museum at the Getty Center, Los Angeles, from October 5, 2015, to February 21, 2016.

The Spiral Dance-Starhawk 2011-09-13 The twentieth anniversary edition of The Spiral Dance celebrates the pivotal role the book has had in bringing Goddess worship to the religious forefront. This bestselling classic is both an unparalleled reference on the practices and philosophies of Witchcraft and a guide to the life-affirming ways in which readers can turn to the Goddess to deepen their sense of personal pride, develop their inner power, and integrate mind, body, and spirit. Starhawk's brilliant, comprehensive overview of the growth, suppression, and modern-day re-emergence of Wicca as a Goddess-worshipping religion has left an indelible mark on the

feminist spiritual consciousness. In a new introduction, Starhawk reveals the ways in which Goddess religion and the practice of ritual have adapted and developed over the last twenty years, and she reflects on the ways in which these changes have influenced and enhanced her original ideas. In the face of an ever-changing world, this invaluable spiritual guidebook is more relevant than ever.

The Field-Lynne McTaggart 2003-08-05 Science has recently begun to prove what ancient myth and religion have always espoused: There may be such a thing as a life force. Lynne McTaggart, indefatigable investigative journalist, reveals a radical new biological paradigm -- that on our most fundamental level, the human mind and body are not distinct and separate from their environment but a packet of pulsating power constantly interacting with this vast energy sea. The Field is a highly readable scientific detective story that offers a stunning picture of an interconnected universe and a new scientific theory that makes sense of supernatural phenomena. Original, well researched, and well documented by distinguished sources, The Field is a book of hope and inspiration for today's world.

Sexus-Henry Miller 2007-12-01 Henry Miller's monumental venture in self-revelation was begun with his Tropic of Cancer and Tropic of Capricorn, which on their American publication were hailed as "miraculous," "superb," "ribald," "brilliant," and "shamelessly shocking." Sexus is the first volume of a series called The Rosy Crucifixion, in which Miller completes his major life work. It was written in the United States during World War II, and first published in Paris in 1949. Of this remarkable project, Lawrence Durrell has said: "The completion of his seven-volume autobiography, if it fulfills the promise of what he has already given us, will put his name amongst the three or four great figures of the age."

Frida by Ishiuchi-Hilda Trujillo 2014-03-31 "Frida by Ishiuchi" is the first photographic documentation ever published of Mexican artist Frida Kahlo's personal attire and belongings, as portrayed by Japanese artist Miyako Ishiuchi. The victim of a nearly fatal bus accident as a young woman, Kahlo used fashion to channel her resulting physical difficulties into courageous statements of heritage, strength and beauty. Also focusing on the ways in which Kahlo used her iconic style to project her feminist and socialist beliefs, Ishiuchi's color photographs transform Kahlo's dresses, corsets, shoes, gloves, jewelry and other accessories into objects freighted with personal struggle, cultural awareness and sartorial inventiveness. Following Ishiuchi's acclaimed series "Mothers" and "Hiroshima," this collection provides a special look at a very intimate dimension of Frida Kahlo's universe.

Man's Subtle Bodies and Centres-Omraam Mikhaël Aïvanhov 1986 Book Was There-Andrew Piper 2012-10-12 Andrew Piper grew up liking books and loving computers. While occasionally burying his nose in books, he was going to computer camp, programming his Radio Shack TRS-80, and playing Pong. His eventual love of reading made him a historian of the book and a connoisseur of print, but as a card-carrying member of the first digital generation—and the father of two digital natives—he understands that we live in electronic times. Book Was There is Piper's surprising and always entertaining essay on reading in an e-reader world. Much ink has been spilled lamenting or championing the decline of printed books, but Piper shows that the rich history of reading itself offers unexpected clues to what lies in store for books, print or digital. From medieval manuscript books to today's playable media and interactive urban fictions, Piper explores the manifold ways that physical media have shaped how we read, while also observing his own children as they face the struggles and triumphs of learning to read. In doing so, he uncovers the intimate connections we develop with our reading materials—how we hold them, look at them, share them, play with them, and even where we read them—and shows how reading is interwoven with our experiences in life. Piper reveals that reading's many identities, past and present, on page and on screen, are the key to helping us understand the kind of reading we care about and how new technologies will—and will not—change old habits. Contending that our experience of reading belies naive generalizations about the future of books, Book Was There is an elegantly argued and thoroughly up-to-date tribute to the endurance of books in our ever-evolving digital world.

Recent Advances in Biophoton Research and Its Applications-Fritz Albert Popp 1992 Biophoton emission now belongs to a topical field of modern science: It concerns a weak light emission from biological systems. Such molecular events are clearly compatible with collective phenomena as shown by recent developments in the life sciences such as the chaos theory. This book is concerned with the 'optical window' of biological interactions and in view of their correlations to many biological functions they provide a powerful, non-invasive tool of analysing biological systems. Topics include food science, pollution, efficacy of drugs including the treatment of cancer and immune diseases, and communication phenomena such as consciousness. The collection of articles in this book covers the historical background, the physics of biophoton emission, those biological phenomena which show evidence of a 'holistic' character, and finally discusses applications and biological evolution. This volume serves to bring researchers up-to-date on the subject and draws attention to the many exciting findings that are widely scattered in the scientific literature.

This shift is the coming Age of Light, and the entry of our solar system into the Photon Band and the Age of Aquarius.

The Sevenfold Journey-Anodea Judith 1993 Techniques for healing, utilising the seven energy centres of ancient medicine.

Doing Science: In The Light Of Philosophy-Bunge Mario Augusto 2016-11-25 Nearly all philosophers have dealt with the outcomes of scientific research, and have overlooked its philosophical presuppositions, such as those of rationality and realism. Although these presuppositions are mostly tacit and thus easily overlooked, actually they are supremely important, since some of them favor research whereas others hamper it. For instance, whereas subjectivism leads to navel gazing and uncontrolled fantasy, realism encourages us to explore the world and check our conjectures. This book examines science in the making, a process it illustrates with many examples from the natural, social, and biosocial sciences. Therefore it centers on the research process and its philosophical presuppositions. It claims that the latter constitutes a sort of matrix for conceiving and nurturing scientific projects.
