Writing Your Dissertation in Fifteen Minutes a Day-Joan Bolker 1998-08-15 Expert writing advice from the editor of the Boston Globe best-seller, The Writer's Home Companion Dissertation writers need strong, practical advice, as well as someone to assure them that their struggles aren't unique. Joan Bolker, midwife to more than one hundred dissertations and co-founder of the Harvard Writing Center, offers invaluable suggestions for the graduate-student writer. Using positive reinforcement, she begins by reminding thesis writers that being able to devote themselves to a project that truly interests them can be a pleasurable adventure. She encourages them to pay close attention to their writing method in order to discover their individual work strategies that promote productivity; to stop feeling fearful that they may disappoint their advisors or family members; and to tailor their theses to their own writing style and personality needs. Using field-tested strategies she assists the student through the entire thesis-writing process, offering advice on choosing a topic and an advisor, on disciplining one's self to work at least fifteen minutes each day; setting short-term deadlines, on revising and defing the thesis, and on life and publication after the dissertation. Bolker makes writing the dissertation an enjoyable challenge.

The Professor Is In-Karen Kelsky 2015-08-04 The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who

simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site The Professor is In, she has helped countless Ph.D.'s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: -When, where, and what to publish -Writing a foolproof grant application -Cultivating references and crafting the perfect CV -Acing the job talk and campus interview -Avoiding the adjunct trap -Making the leap to nonacademic work, when the time is right The Professor Is In addresses all of these issues, and many more.

How to Write a PhD in Less Than 3 Years-Steven Harrison 2010-10 I have purchased the ' Personalized Back Cover' option and this is the text that should appear at the back cover of my book: Is there room for yet another book on PhD-writing? Yes there is. Most of the available publications on this topic are contributions from professional academics, written from the perspective of supervisors or examiners rather than from that of successful candidates. Most of them are too long and not always user-friendly, while their approach is, more often than not, too scientific to be accessible to the average candidate. It is with these considerations in mind that the author, an average doctoral candidate who wrote his PhD thesis while working full-time, submitting his written work for examination within 24 months of becoming registered as a research student in one of the UK's top Law Schools, set out to write this book, which is, uniquely, written from a student's perspective. What makes of this work an original contribution is not the novelty of the topic addressed in it but, rather, its brevity, its practical approach, its simplicity, the background of its author (a recent, successful PhD candidate) and the motivation of

its author: to help candidates complete their PhD thesis in under three years, as the author of this book did. This short book contains a wealth of practical advice and guidance on the issues involved in conceptualizing, organizing and writing your doctoral thesis so that you can increase your chances of surviving the ordeal of PhD thesis writing with the least amount of pain and with the minimum investment in terms of the time and effort spent pursuing your objective.

The Lean PhD-Julian Kirchherr 2018-05-18  
From Dissertation to Book-William Germano 2008-04-15 All new Phd's hope that their dissertations can become books. But a dissertation is written for a committee and a book for the larger world. William Germano's From Dissertation to Book is the essential guide for academic writers who want to revise a doctoral thesis for publication. The author of Getting It Published, Germano draws upon his extensive experience in academic publishing to provide writers with a state-of-the-art view of how to turn a dissertation into a manuscript that publishers will notice. Acknowledging first that not all theses can become books, Germano shows how some dissertations might have a better life as one or more journal articles or as chapters in a newly conceived book. But even dissertations strong enough to be published as books first need to become book manuscripts, and at the heart of From Dissertation to Book is the idea that revising the dissertation is a fundamental process of adapting from one genre of writing to another. Germano offers clear guidance on how to do just this. Writers will find advice on such topics as rethinking the table of contents, taming runaway footnotes, shaping chapter length, and confronting the limitations of jargon, alongside helpful timetables for light or heavy revision. With crisp directives, engaging examples, and a sympathetic eye for the foibles of academic writing, From Dissertation to Book reveals to recent PhD's the process of careful and thoughtful revision—a truly invaluable skill as they grow into their new roles as professional writers.

Getting a PhD in Law-Caroline Morris 2011-09-01  
Getting a PhD in Law is a unique guide to obtaining the degree of Doctor of Philosophy of Law in the UK. While there is a wide range of study guides for PhD students in the social sciences and other science-based disciplines, there is very little information available on the process of obtaining a PhD in law. Research degrees in law share some attributes with those in related disciplines such as the humanities and

social sciences. However, legal methodology and the place of the PhD in law in the young lawyer's career create unique challenges that have not been addressed by existing guides. Getting a PhD in Law fills this clear gap in the market, providing an accessible guide to the PhD process from topic selection to thesis publication. This readable and informative guide draws on interviews and case studies with PhD students, supervisors and examiners. Getting a PhD in Law will be essential reading for the growing numbers of PhD students in the UK's many law schools—and those internationally who wish to learn from UK best practice.

Writing a Watertight Thesis-Mike Bottery 2019-05-02 Writing a doctoral thesis can be an arduous and confusing process. This book provides a clear framework for developing a sound structure for your thesis, using a simple approach to make it watertight, defensible and clear. Bottery and Wright draw on their extensive experience of supervising and examining numerous doctorates from an internationally diverse and multicultural student body both in the UK and overseas, and include examples of how successful theses have been made watertight along with exercises to enable readers to do the same thing to their own thesis. The authors demonstrate how the key to making a thesis watertight lies in selecting the central research question and the sub-research questions that together collectively answer this main one. If these questions are well formulated the thesis can be defended successfully against criticism on structural grounds – a major part of the battle. Including chapters on the viva process, strength-testing your thesis and essential preparation for writing up your research, this is the resource for anyone looking to produce a well-structured, watertight piece of research.

Authoring a PhD-P. Dunleavy 2013-11-30  
Thesis and Dissertation Writing in a Second Language-Brian Paltridge 2007-06-11 The relationship of supervisor to student has traditionally been seen as one of apprenticeship, in which much learning is tacit, with the expectation that the student will become much like the tutor. The changing demographics of higher education in conjunction with imperatives of greater accountability and support for research students have rendered this scenario both less likely and less desirable and unfortunately many supervisors are challenged by the task of guiding non-native speaker students to completion. This handbook is the

ideal guide for all supervisors working with undergraduate and postgraduate non-native speaker students writing a thesis or dissertation in English as it explicitly unpacks thesis writing, using language that is accessible to research supervisors from any discipline.

Prepare, Succeed, Advance-Nijay K Gupta 2017-08-31 Achieving a PhD in Biblical Studies raises questions about different stages of the process commonly encountered by those who venture into the academic world. In Prepare, Succeed, Advance, Nijay K. Gupta divides the procedure into three specific phases: Prepare, which focusses on choosing the right doctoral programme and applying for it; Succeed, which deals with the delicate challenge of writing a defensible thesis; and Advance, in which he gives advice on how to face issues with success in career development in the academic field. Gupta offers discussions of and answers to the most pertinent and pressing questions that prospective and current doctoral students come in contact with in a guidebook that tackles any doubts from an authoritative perspective with a remarkable amount of personal experience.

Writing for Social Scientists-Howard S. Becker 2008-11-15 Students and researchers all write under pressure, and those pressures—most lamentably, the desire to impress your audience rather than to communicate with them—often lead to pretentious prose, academic posturing, and, not infrequently, writer's block. Sociologist Howard S. Becker has written the classic book on how to conquer these pressures and simply write. First published nearly twenty years ago, Writing for Social Scientists has become a lifesaver for writers in all fields, from beginning students to published authors. Becker's message is clear: in order to learn how to write, take a deep breath and then begin writing. Revise. Repeat. It is not always an easy process, as Becker wryly relates. Decades of teaching, researching, and writing have given him plenty of material, and Becker neatly exposes the foibles of academia and its "publish or perish" atmosphere. Wordiness, the passive voice, inserting a "the way in which" when a simple "how" will do—all these mechanisms are a part of the social structure of academic writing. By shrugging off such impediments—or at the very least, putting them aside for a few hours—we can reform our work habits and start writing lucidly without worrying about grades, peer approval, or the "literature." In this new edition, Becker takes account of major changes in the computer tools available to writers today, and also substantially expands his

analysis of how academic institutions create problems for them. As competition in academia grows increasingly heated, Writing for Social Scientists will provide solace to a new generation of frazzled, would-be writers.

Thesis Writing for Master's and Ph.D. Program-Subhash Chandra Parija 2018-11-03 This book on Thesis Writing for Master's and Ph.D. program focuses on the difficulties students encounter with regard to choosing a guide; selecting an appropriate research title considering the available resources; conducting research; and ways to overcome the hardships they face while researching, writing and preparing their dissertation for submission. Thesis writing is an essential skill that medical and other postgraduates are expected to learn during their academic career as a mandatory partial requirement in order to receive the Master's degree. However, at the majority of medical schools, writing a thesis is largely based on self-learning, which adds to the burden on students due to the tremendous amount of time spent learning the writing skills in addition to their exhausting clinical and academic work. Due to the difficulties faced during the early grooming years and lack of adequate guidance, acquiring writing skills continues to be a daunting task for most students. This book addresses these difficulties and deficiencies and provides comprehensive guidance, from selecting the research title to publishing in a scientific journal. Manifesto for the Humanities-Sidonie Ann Smith 2015-11-25 After a remarkable career in higher education, Sidonie Smith offers *Manifesto for the Humanities* as a reflective contribution to the current academic conversation over the place of the Humanities in the 21st century. Her focus is on doctoral education and opportunities she sees for its reform. Grounding this manifesto in background factors contributing to current "crises" in the humanities, Smith advocates for a 21st century doctoral education responsive to the changing ecology of humanistic scholarship and teaching. She elaborates a more expansive conceptualization of coursework and dissertation, a more robust, engaged public humanities, and a more diverse, collaborative, and networked sociality.

You Must Be Very Intelligent-Karin Bodewits 2017-07-03 You Must be Very Intelligent is the author's account of studying for a PhD in a modern, successful university. Part-memoir and part-exposé, this book is highly entertaining and unusually revealing about the dubious morality and desperate behaviour which underpins competition in twenty-first century academia. This witty, warts-and-all account of Bodewits' years as a PhD student in the august University of Edinburgh is full of success and failure, passion and pathos, insight, farce and warm-hearted disillusionment. She describes a world of collaboration and backstabbing; nefarious financing and wasted genius; cosmopolitan dreamers and discoveries that might just change the world... Is this a smart people's world or a drip can of weird species? Modern academia is certainly darker and stranger than one might suspect... This book will put a wry, knowing smile on the faces of former researchers. And it is a cautionary parable for innocents who still believe that lofty academia is erected upon moral high ground...

Undertaking a PhD & completing the task can be daunting. Yet one is being asked for an incremental increase rather than a paradigm shift in knowledge. Why I Write-George Orwell 2021-01-01 George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature - his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Why I Write, the first in the

Orwell's Essays series, Orwell describes his journey to becoming a writer, and his movement from writing poems to short stories to the essays, fiction and non-fiction we remember him for. He also discusses what he sees as the 'four great motives for writing' - 'sheer egoism', 'aesthetic enthusiasm', 'historical impulse' and 'political purpose' - and considers the importance of keeping these in balance. Why I Write is a unique opportunity to look into Orwell's mind, and it grants the reader an entirely different vantage point from which to consider the rest of the great writer's oeuvre. 'A writer who can - and must - be rediscovered with every age.' — Irish Times

The Craft of Research, 2nd edition-Wayne C. Booth 2008-04-15 Since 1995, more than 150,000 students and researchers have turned to The Craft of Research for clear and helpful guidance on how to conduct research and report it effectively. Now, master teachers Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams present a completely revised and updated version of their classic handbook. Like its predecessor, this new edition reflects the way researchers actually work: in a complex circuit of thinking, writing, revising, and rethinking. It shows how each part of this process influences the others and how a successful research report is an orchestrated conversation between a researcher and a reader. Along with many other topics, The Craft of Research explains how to build an argument that motivates readers to accept a claim; how to anticipate the reservations of thoughtful yet critical readers

and to respond to them appropriately; and how to create introductions and conclusions that answer that most demanding question, "So what?" Celebrated by reviewers for its logic and clarity, this popular book retains its five-part structure. Part 1 provides an orientation to the research process and begins the discussion of what motivates researchers and their readers. Part 2 focuses on finding a topic, planning the project, and locating appropriate sources. This section is brought up to date with new information on the role of the Internet in research, including how to find and evaluate sources, avoid their misuse, and test their reliability. Part 3 explains the art of making an argument and supporting it. The authors have extensively revised this section to present the structure of an argument in clearer and more accessible terms than in the first edition. New distinctions are made among reasons, evidence, and reports of evidence. The concepts of qualifications and rebuttals are recast as acknowledgment and response. Part 4 covers drafting and revising, and offers new information on the visual representation of data. Part 5 concludes the book with an updated discussion of the ethics of research, as well as an expanded bibliography that includes many electronic sources. The new edition retains the accessibility, insights, and directness that have made The Craft of Research an indispensable guide for anyone doing research, from students in high school through advanced graduate study to businesspeople and government employees. The authors demonstrate convincingly that researching and reporting skills can be learned and used by all who undertake research projects. New to this edition: Extensive coverage of how to do research on the internet, including how to evaluate and test the reliability of sources New information on the visual representation of data Expanded bibliography with many electronic sources
