Autoestima para principiantes-Amado Ramírez Villafañez 2013-11-28 En este libro de madurez el psicólogo, terapeuta y escritor vallisoletano Amado Ramírez sintetiza y compendia bajo el complejo y poliédrico concepto de autoestima parte de sus ideas sobre las, a veces poco claras y desequilibradas, relaciones entre el individuo y la sociedad. Con una positiva y generosa visión del ser humano y de su capacidad para hacer "un arte del convivir", se nos desvelan las herramientas prácticas para ampliar nuestra conciencia y fortalecer una autoestima movilizadora e independiente, que nos permita integrar sin conflictos nuestra triple vertiente animal, social y espiritual en una vida plena. No se encuentra en estas páginas un mero análisis teórico sobre las múltiples facetas de la autoestima, sino un relato preciso y pedagógico que va más allá de los lugares comunes que suelen asociar esta cualidad del carácter al éxito y al reconocimiento social. Manifiesta el autor su voluntad de azuzar las conciencias y ayudar en la resolución de conflictos personales con origen en la inseguridad y el miedo de una confianza herida.

1984-George Orwell 1983-10-17 A PBS Great American Read Top 100 Pick With extraordinary relevance and renewed popularity, George Orwell’s 1984 takes on new life in this edition. “Orwell saw, to his credit, that the act of falsifying reality is only secondarily a way of changing perceptions. It is, above all, a way of asserting power.”—The New Yorker In 1984, London is a grim city in the totalitarian state of Oceania where Big Brother is always watching you and the Thought Police can practically read your mind. Winston Smith is a man in grave danger for the simple reason that his memory still functions. Drawn into a forbidden love affair, Winston finds the courage to join a secret revolutionary organization called The Brotherhood, dedicated to the destruction of the Party. Together with his beloved Julia, he hazards his life in a deadly match against the powers that be. Lionel Trilling said of Orwell’s masterpiece, “1984 is a profound, terrifying, and wholly fascinating book. It is a fantasy of the political future, and like any such fantasy, serves its author as a magnifying device for an examination of the present.” Though the year 1984 now exists in the past, Orwell’s novel remains an urgent call for the individual willing to speak truth to power.

Punkzilla-Adam Rapp 2010-03-16 An award-winning writer and playwright hits the open road for a searing novel-in-letters about a street kid on a highstakes trek across America. For a runaway boy who goes by the name "Punkzilla," kicking a meth habit and a life of petty crime in Portland, Oregon, is a prelude to a mission: reconnecting with his older brother, a gay man dying of cancer in Memphis. Against a backdrop of seedy motels, dicey bus stations, and hitched rides, the desperate fourteen-year-old meets a colorful, sometimes dangerous cast of characters. And in letters to his sibling, he catalogs them all -- from an abusive stranger and a ghostly girl to a kind transsexual and an old woman with an oozing eye. The language is raw and revealing, crackling with visceral details and dark humor, yet with each interstate exit Punkzilla’s journey grows more urgent: will he make it to Tennessee in time? This daring novel offers a narrative worthy of Kerouac and a keen insight into the power of chance encounters.

Strategic Occidentalism-Ignacio M. Sanchez Prado 2018-08-15 Strategic Occidentalism examines the transformation, in both aesthetics and infrastructure, of Mexican fiction since the late 1970s. During this time a framework has emerged characterized by the corporatization of publishing, a frictional relationship between Mexican

literature and global book markets, and the desire of Mexican writers to break from dominant models of national culture. In the course of this analysis, Ignacio M. Sánchez Prado engages with theories of world literature, proposing that “world literature” is a construction produced at various levels, including the national, that must be studied from its material conditions of production in specific sites. In particular, he argues that Mexican writers have engaged in a “strategic Occidentalism” in which their idiosyncratic connections with world literature have responded to dynamics different from those identified by world-systems or diffusionist theorists. Strategic Occidentalism identifies three scenes in which a cosmopolitan aesthetics in Mexican world literature has been produced: Sergio Pitol’s translation of Eastern European and marginal British modernist literature; the emergence of the Crack group as a polemic against the legacies of magical realism; and the challenges of writers like Carmen Boullosa, Cristina Rivera Garza, and Ana García Bergua to the roles traditionally assigned to Latin American writers in world literature. Expressionism and Film-Rudolf Kurtz 2016-03-21 Expressionism and Film, originally published in German in 1926, is not only a classic of film history, but also an important work from the early phase of modern media history. Written with analytical brilliance and historical vision by a well-known contemporary of the expressionist movement, it captures Expressionism at the time of its impending conclusion—as an intersection of world view, resoluteness of form, and medial transition. Though one of the most frequently-cited works of Weimar culture, Kurtz’s groundbreaking work, which is on a par with Siegfried Kracauer’s From Caligari to Hitler and Lotte Eisner’s The Haunted Screen, has never been published in English. Its relevance and historical contexts are analyzed in a concise afterword by the Swiss scholars Christian Kiening and Ulrich Johannes Beil.

On Murder Considered as One of the Fine Arts-Thomas De Quincey 2015-02-26 'People begin to see that something more goes to the composition of a fine murder than two blockheads to kill and be killed - a knife - a purse - and a dark lane...' In this provocative and blackly funny essay, Thomas de Quincey considers murder in a purely aesthetic light and explains how practically every philosopher over the past two hundred years has been murdered - 'insomuch, that if a man calls himself a philosopher, and never had his life attempted, rest assured there is nothing in him'. Introducing Little Black Classics: 80 books for Penguin's 80th birthday. In Search of the Virtual Class-Lalita Rajasingham 2002-09-11 'Shirley zips into her skin-tight school uniform, which on the outside looks something like a ski suit. The lining of the suit in fact contains cabling that makes the suit a communication system and there are pressure pads where the suit touches skin that give a sense of touch. Next, she sits astride something that is a bit like a motorbike, except that it has no wheels and is attached firmly to the floor. Her feet fit on to something similar to a brake and accelerator and her gloved hands hold onto handlebars. She shouts, "I'm off to school, Dad". Her father, who is taking time out from his teleworking, begins to remind her that the family are going teleshopping in the virtual city later in the day, but it is too late, his daughter has already donned her school helmet. She is no longer in the real world of her real home, she is in the virtual world of her virtual school.' Is this the shape of the future of education? This book presents a vision of what will happen to education and training as information technology develops. The argument is simple. To prepare people for life in an information society they need to be taught with the technology of an information society. But what shape will that take? Can the classroom as we know it - a communications system which has been in place for four thousand years - be replaced? The authors argue that through the development of telecommunications for telelearning a genuine revolution in education is in the making. The book describes how, through the convergence of a cluster of new technologies including virtual reality, artificial intelligence, nanotechnology and the superhighways of telecommunications, a new educational paradigm will emerge in the form of a virtual class. Teachers, trainers and educators who worry about how best to prepare students for life in an ever-changing world will find much inspiration in this engagingly written and jargon-free book Exercise, Health and Mental Health-Guy E. J. Faulkner 2005 The first of its kind, this book is written by internationally acclaimed scientists and presents an introduction to the emerging field of exercise as a strategy for mental health promotion, providing a platform for future research and practice.

Early Algebra-Carolyn Kieran 2016-07-11 This survey of the state of the art on research in early algebra traces the evolution of a relatively new field of research and teaching practice. With its focus on the younger student, aged from about 6 years up to 12 years, this volume reveals the nature of the research that has been carried out in early algebra and how it has shaped the growth of the field. The survey, in presenting examples drawn from the steadily growing research base, highlights both the nature of algebraic thinking and the ways in which this thinking is being developed in the primary and early middle school student. Mathematical relations, patterns, and arithmetical structures lie at the heart of early algebraic activity, with processes such as noticing, conjecturing, generalizing, representing, justifying, and communicating being central to students’ engagement.

Mediation and Protest Movements-Bart Cammaerts 2013-03-19 In recent times, international and national media have been full of stories about protest movements and tumultuous social upheaval from Tunisia to California. But scholars have not yet fully addressed the connection between these movements and the media and communication channels through which their messages spread. Correcting that imbalance, Mediation and Protest Movements explores the nature of the relationship between protest movements, media representation, and communication strategies and tactics. By covering online and offline contexts, as well as mainstream and alternative media, Mediation and Protest Movements bridges the gap between social-movement theory and media and communication studies, making this an important text for students and scholars of the media and social change.

Educational Algebra-Eugenio Filloy 2007-10-12 This book takes a theoretical perspective on the study of school algebra, in which both semiotics and history occur. The Methodological design allows for the interpretation of specific phenomena and the inclusion of evidence not addressed in more general treatments. The book gives priority to "meaning in use" over "formal meaning". These approaches and others of similar nature lead to a focus on competence rather than a user's activity with mathematical language.

The Whispering of Ghosts-Boris Cyrulnik 2010 One out of every two people will experience trauma, says psychiatrist Boris Cyrulnik, and one in ten will remain a prisoner of that suffering. Why are some children permanently damaged by difficult childhoods, while others grow up into secure, creative, loving adults? This book, based on Dr. Cyrulnik's broad experience with victims of childhood distress, offers a message of hope for everyone concerned about the impact of deprivation and such traumatic events as separation, emotional or sexual abuse, and violence in the environment. The ghosts of the past keep on whispering to the child within the adult.

Through dozens of moving, vivid examples, Dr. Cyrulnik describes the ingredients of resilience, the ability to heal the wounded self and move on, to make sense of what happened back then and form new emotional and social ties. Affection is such a vital need, he writes, that those who were deprived of it will attach themselves intensely to anything that rekindles a spark of life, whatever the cost. From the earliest parent-child bonding to the sexual turbulence of the teenage years, this book shows what

makes for success or failure in the struggle to gain freedom from early pain.
