An Introduction to Biological Evolution-Kenneth V. Kardong 2005 Written for a general college audience, this book offers an introduction to the principles and significance of Darwinian evolution. It differs from most other textbooks on evolution in three fundamental ways: first, it is intended for students taking evolution early in their studies; second, it examines the intellectual significance of Darwinian evolution; and third, the text departs from the standard treatment of evolution in other textbooks, wherein the arguments are reductionist, molecular, and overwhelmingly genetic in emphasis. Ken Kardong, also author of Vertebrates; Comparative Anatomy, Function, Evolution, is known for his accessible writing style. His almost conversational approach to this topic puts the reader at ease while learning evolutionary concepts. The result is an inviting book that will be read.

Franco Sbarro/Concept cars-Fabian Sbarro 2008 Elles sont toutes réunies. Des coupés Filipmethi à la Pendocar en passant par l'impressionnant Monster, les répliques de GT40, la Challenge ou le programme de la roue sans moyeu, les principales créations de Franco Sbarro exhibent à nouveau leurs charmes. A la croisée des chemins entre l'artisanat, les exigences industrielles et la créativité pure, cet Italien, né à Presicce, a réussi à s'affirmer comme l'un des maîtres de l'innovation automobile. Ce livre témoigne d'une véritable aventure humaine en retraçant la genèse de tous ces prototypes, où le relationnel tient autant de place que la technique. Illustré par les plus grands noms de la photographie automobile (Alberto Martinez, Peter Vann, Dingo, etc.), cet ouvrage bilingue (français/anglais) revient sur le parcours de Sbarro, raconté par ses concepts cars.

Medicine and the Seven Deadly Sins in Late Medieval Literature and Culture-Virginia Langum 2016-09-15 This book considers how scientists, theologians, priests, and poets approached the relationship of the human body and ethics in the later Middle Ages. Is medicine merely a metaphor for sin? Or can certain kinds of bodies physiologically dispose people to be angry, sad, or greedy? If so, then is it their fault? Virginia Langum offers an account of the medical imagery used to describe feelings and actions in religious and literary contexts, referencing a variety of behavioral discussions within medical contexts. The study draws upon medical and theological writing for its philosophical basis, and upon more popular works of religion, as well as poetry, to show how these themes were articulated, explored, and questioned more widely in medieval culture.

H. P. Lovecraft: The Decline of the West-S. T. Joshi 2016-05-28 The author writes: This book began as an expansion of my essay, "H. P. Lovecraft: The Decline of the West," in The Weird Tale, but very quickly became something quite different, to the degree that the two works have little save the title in common. I have always been interested in Lovecraft the philosopher, and in my Starmont Reader's Guide to Lovecraft (1982) I attempted a very compressed account of his philosophical views. To treat so complex a thinker as Lovecraft in a few pages was obviously untenable, even though I think those few pages at least convey the unity of his thought -- perhaps better than this fuller study does. One reviewer, however, was correct in noting that I did not sufficiently integrate Lovecraft's thought and his fiction, and I have now attempted to remedy the failing. I am still not convinced that I have really written one rather than two books here. Does Lovecraft's fiction really depend upon his philosophy? I wrestle with this question further in my introduction, but here I can note that I had great difficulty deciding upon the proper structure for this book. I deal with four principal facets of Lovecraft's philosophy -- metaphysics, ethics, aesthetics, and politics -- in Part I, and those same facets as applied to the fiction in Part II. It might have made more sense to juxtapose the corresponding chapters of each part, but I finally determined that this would be both methodologically and practically unsound; methodologically for reasons explained in the introduction, and practically because it would fail to demonstrate the interconnectedness of Lovecraft's thought and because in Part II I frequently rely upon conceptions expressed throughout the whole of Part I. In Part I, the author deals with four principal facets of Lovecraft's philosophy: metaphysics, ethics, aesthetics, and politics. In Part II, he studies those same facets as applied to the fiction.

Knots for Climbers-Craig Luebben 2011-04-01 Teaches the reader the Twelve Essential Climbing Knots, and then presents eighteen others for various special situations. Color illustrations make learning these knots a cinch. Black Days, Black Dust-Robert Armstead 2002 Among those drawn to jobs in the booming West Virginia coal mines during the first part of the twentieth century were thousands of African Americans. They proved successful in this industry--despite low wages and discrimination at the hands of mine operators. This book, the first published memoir by an African American coal miner, is a stirring tale of survival and achievement. Bob Armstead interweaves stories of family and community with a broad history of underground mining to paint an engrossing picture of the work, the dangers, and the drama of that industry. Armstead remembers his childhood, growing up in a segregated coal camp during the Great Depression, and he recalls his family's efforts to confront economic challenges while also dealing with the reality of racism. His father worked as a horse driver in the mines until machinery put him out of work. Even though, as a youth, Armstead saw how his father had suffered, he himself went to work in the mines in 1947. From his first day on the job, coal mining fascinated him. He initially labored in a timber crew, shoring up mine roofs. Then, in a life peppered with mine closings and layoffs that sent him from one place to another in search of work, he eventually became a mining machine operator, a foreman over predominantly white crews, and finally a safety inspector. Black Days, Black Dust evokes a vivid sense of a coal miner's life. Armstead's recollections of his father provide descriptions of primitive mining methods in the 1930s and grueling twelve-hour work days. Armstead's memories of his own career document his enthusiasm for mining and the work ethic that earned him responsible positions in the mines. Engagingly told, Armstead's story is both a rich historical document and a moving portrait of one man's life and how he overcame adversity. The Authors: Robert Armstead retired from the coal mines in 1987. He died in 1998. S. L. Gardner is a former teacher and librarian who has written feature articles about coal camps for the Times West Virginian in Fairmont, West Virginia. Her article on the Armstead family appeared in the magazine Goldenseal.

The Christian Moral Life-John Rziha 2017-06-30 To take a journey, travelers must know where they are, where they are going, and how to get there. Moral theology examines the same three truths. The Christian Moral Life is a handbook for moral theology that uses the theme of a journey to explain its key ethical concepts. First, humans begin with their creation in the image of God. Secondly, the goal of the journey is explained as a loving union with God, to achieve a share in his eternal happiness. Third and finally, the majority of the book examines how to attain this goal. Within the journey motif, the book covers the moral principles essential for attaining true happiness. Based on an examination of the moral methodology in the bible, the book discusses the importance of participating in divine nature through grace in order to attain eternal happiness. It further notes the role of law, virtue, and the gifts of the Holy Spirit in guiding and transforming humans into friends of God, who participate in his happiness. Following this section on moral theology in general, the book analyzes the individual virtues to give more concrete guidance. The entire project builds upon the insights of great Christian thinkers, such as Thomas Aquinas, Thérèse of Lisieux, and John Paul II, to uncover the moral wisdom in scripture and to show people how to be truly happy both in this life and the next. This book will be of great interest to undergraduate students of moral theology, priests and seminarians, parents and teachers seeking to raise and to form happy children, and anyone interested in discovering the meaning of true happiness.

Mary Magdalene, Princess of Orange-Ralph Ellis 2011-06-01 New revised and expanded 2015 edition. \*\* Mary Magdalene in Provence, France \*\* Ralph Ellis follows the trail of mythology and reveals compelling circumstantial evidence that Mary Magdalene did travel to France, and that her presence there has left its mark on the history of the region. Ralph then presents further information suggesting that the legacy of Mary Magdalene in Provence was bequeathed upon the city of Orange in southern France - the city that was central to the Royal Dutch House of Orange, and thus central to the entire Reformation and Enlightenment movement. The book then goes on to explore the Orange Enlightenment and the Age of Reason, the twin religious reforms that created the modern rational and technical world that we live in today. But this era of rationality and reason is now threatened by forces of darkness that seek to extinguish the gains of the Enlightenment. Will the twin fundamentalist forces of Environmentalism and Islam take us back to the Dark Ages, and into a new era of fear, ignorance and oppression? In this section, Ralph Ellis tackles some ancient and modern taboos with his characteristic hard-hitting style. Each and every politically-correct stone is overturned, in this robust defence of the intellectual freedoms and scientific rationality that underpinned the Enlightenment Era. An addition to the 'King Jesus Trilogy'. Follows on from

How can we help build a global grassroots movement of nonviolence to disarm the world, relieve unjust human suffering, make a more just society and protect creation and all creatures? What is a nonviolent life?" These are the questions John Dear, Nobel Peace Prize nominee and Pace e Bene staff member poses in his latest book, The Nonviolent Life. He focuses on three important aspects on the path toward becoming people of nonviolence - being nonviolent toward ourselves; being nonviolent to all others (including creation and creatures); and joining the global grassroots movement of nonviolence. After thirty years of preaching the Gospel of nonviolence John says he has never found a book that completely captures these crucial elements of nonviolent living. According to John, "most people pick one or two of these dimensions, but few do all three. To become a fully rounded, three dimensional person of nonviolence we need to do all three simultaneously." In this book, John Dear explores the powerful journey of nonviolence rooted in the Christian vision of love. He also offers discussion questions throughout the book making it ideal for study groups seeking to go deeper into the nonviolent life.
