A panoramic historical epic and an unforgettable love story from the author of The Tenderness of Wolves, for fans of Kristin Hannah, Sarah Perry, and Barbara Kingsolver A whaler's daughter, Flora Mackie first crossed the Arctic Circle at the age of twelve. Years later, in 1892, determination and chance lead her back to northern Greenland as a scientist at the head of a British expedition, defying the expectations of those who believe a woman has no place in that harsh world. Geologist Jakob de Beyn was raised in Manhattan. Yearning for wider horizons, he joins a rival expedition. Jakob and Flora's paths cross. It is a fateful meeting, where passion and ambition collide and an irresistible attraction is born. The violent extremes of the north obsess them both: perpetual night and endless day; frozen seas and coastal meadows, and the strange, maddening pull it exerts on the people

The Phaeton Report-Albert Salvado 2014-10-06 Winston Churchill said: the further we look into the past, the further we will see into the future. A famous writer knows in a party a man who tells her about USC (Universal Scientific Community), secret society created in times of Galileo Galilei that is dedicated to preserving the knowledge and the scientific truth against the attacks of the religions and official departments. In the middle of the feast the man mysteriously disappears and the writer discovers that nobody knows or has seen him. Surprised, the writer researches and locates a member of USC that gives him access to true and remote history of humanity and the lies that have come to us to the present. Even he allows him to get into USC and meet other members. The real surprise comes when they reveal him (and show him!) the existence and destruction in times of Pangea, the only continent, and that the Great Flood was not work of the wrath of God, but the result of a human error made by an ancient civilization that almost kills all humanity. However, even he is going to discover the largest of all the surprises... if we do not, we can commit another mistake and again endanger humanity. Work based on data that are available to the public and which can be checked, the critics has said: "This is no conventional historic novel... This novel breaks all of the accepted rules that orthodox literary criticism follows in judging how novels should

be written (criteria laid down by E. M. Forster and followed by many critics). The book is based on a vast amount of documents and research, which is another way the author breaks the rules, because he does not conceal anything... and he does all that without breaking step, as if it were a game... This is a controversial book... My life will never be the same after reading The Phaeton Report."(Carme J. Huertas, writer, EMBAT) "His most ambitious book. If Albert Salvado (Andorra la Vella) had been born in another part of the globe he would be a bestselling author... He has more than a score of books under his belt, mostly historical novels, which are unspoiled by any pretensions to bestseller status."(Joan Joseph Isern, AVUI) "The Phaeton Report is a frenetic novel in which the Andorran writer Albert Salvado revises the official version of the Great Flood and warns of the dangers of climate change." (Xavier Aldekoa, LA VANGUARDIA) ..". The Phaeton Report is a real surprise ... an intelligent bestseller." (Jordi Valls, AVUI) ..".it goes down delightfully and leaves a refreshing taste in your mouth... impressive work... science fiction of the highest order... direct, linear narration coupled with a vast amount of information." (Antonio J. Ubero, ELFARO) "The Phaeton Report, a great legend that will make history with a truly possible account. His readers are in for a treat because the range of settings portrayed allows them to enjoy a long journey to the City of the Sun." (El raco del llibre, 7DIES) ..". very well argued and documented." (Albert Jorquera, DIARI DE VILANOVA)"

In order to accomplish this purpose, ten chapters are presented with focus on varying methods for biomechanical analysis of cycling motion. The introduction section provides an overview of the main methods for assessment of cycling motion, including motion analysis, pedal force measurements, muscle activation, anthropometry and joint kinetics. These methods are discussed in depth in individual chapters followed by chapters on characteristics of bicycles and potential perspectives to improve their configuration in order to improve performance of cyclists and reduce their overuse injury risk. Moreover, a preliminary method to train technique in cyclists is shown. A final chapter provides authors perspective on the upcoming technology that should be effective in helping training of cyclists.

The Horse Soldier, 1776-1943: The last of the Indian wars, the Spanish-American War, the brink of the Great War, 1881-1916-Randy Steffen 1979 Precision-C. X. Wong 2011-03 "Precision ... Statistical and Mathematical Methods in Horse Racing" thoroughly discusses the mathematical and statistical methods in handicapping and betting techniques. Differentiations, combinatorics, normal distribution, kernel smoothing and other mathematical and statistical tools are introduced. The jargons and equations are kept to a minimum so that it is easy to understand for most readers. More than 20 professional programs are freely available to download, which can allow readers to easily apply the methodology introduced in the book. This book can be divided into three main parts: horse handicapping (Chapters 2-6), wagering (Chapters 7-9) and theories in practices (Chapters 10-11). Chapter 1 will explain why long term gains are possible in horse racing. About horse handicapping, we will start with analysing racing forms in Chapter 2. Other handicapping factors such as weight carried, jockeys, trainers and pedigrees will be discussed in Chapter 3. Some advanced statistical methods, such as chi-square test and kernel smoothing, will be introduced in Chapter 4 to further analyse those handicapping factors discussed in previous chapters. The following two chapters are about probability estimations. In Chapter 5, normal distribution and multinomial logistic regression are introduced in estimating winning probability of each race horse. In Chapter 6, we will talk about some methods in misconceptions in estimating placed probability.

Two main concepts in wagering, Kelly criterion and hedging, will be discussed in Chapters 7 and 8. To hit exotic pools, those theories in combinatorics in Chapter 9 will definitely help the readers. The author will share his experiences in betting syndicate in Chapter 10, and tell you how to be a successful professional horseplayer in the last Chapter. Some readers may find the mathematics in this book difficult, but the free program will take your pain away and do all the calculations. You can simply apply all the professional formulae by no more than a click, and pick your horses like an expert analyst. As an awardee in Asian-Pacific Mathematics Olympiad, the author abandoned his career as an actuary and became a key member in a gambling syndicate. This book was reprinted in the 4th edition in Hong Kong, ranked #2 in the best-selling chart in the international Chinese weekly Yazhou Zhoukan, and now available worldwide.

Elements of Logical Reasoning-Jan von Plato 2014-01-23 Some of our earliest experiences of the conclusive force of an argument come from school mathematics: faced with a mathematical proof, we cannot deny the conclusion once the premises have been accepted. Behind such arguments lies a more general pattern of 'demonstrative arguments' that is studied in the science of logic. Logical reasoning is applied at all levels, from everyday life to advanced sciences, and a remarkable level of complexity is achieved in everyday logical reasoning, even if the principles behind it remain intuitive. Jan von Plato provides an accessible but rigorous introduction to an important aspect of contemporary logic: its deductive machinery. He shows that when the forms of logical reasoning are analysed, it turns out that a limited set of first principles can represent any logical argument. His book will be valuable for students of logic, mathematics and computer science.

Unwound-Lorelei James 2014 Martial arts master Ronin Black's need for control is tested by the one woman he'd risk everything for. Original. The Everyday Visionary-Jesse Duplantis 2008-07-08 One of the world's most humorous and dynamic ministers inspires readers to realize their potential and fulfill their dreams using the power of "determined" thoughts. Life is about dreaming, doing, and enjoying yourself in the process. Sometimes it might seem as if your dreams are just too wildly improbable, or there are

too many obstacles standing in your way, or you've missed your window of opportunity. But if those dreams are divinely inspired, hope is far from lost. You just need to know how to visualize the path to your dream to make it a reality. Born a poor Cajun boy in south Louisiana, Jesse Duplantis was a rock musician in his early years and, after a life-changing experience with God, became one of the most candid, and popular, ministers of the Gospel today. For thirty years Jesse Duplantis has demonstrated what life can be when you focus on finding your personal path and nurturing a closer relationship with God and Jesus Christ. Jesse believes God can help anyone to succeed--no matter who you are or where you come from. Weaving visionary-style thinking with powerful life principles and stories from his own life, Jesse shares what destiny really is, how to find yours, and how to avoid letting others kill your joy. You'll also learn about the "Greatest Weaknesses" and "Destiny Killers" that have prevented people from achieving their goals. Other key topics Jesse explores include:

- The amazing power of human imagination: God gave it to you for a reason!
- The strategic power of "determined" thoughts: Learn to use them and see results.
- What to do if you feel it's too late for your dream: God-given dreams have no expiration dates.
- Why you can't have what you speak against: Use the magnetic power of words to draw in what you know is yours.
- How to overcome discouragement: It's okay to shut the door on negativity.
- The big picture: You are important to God, and your dreams and visionary-style thinking may affect future generations. As Jesse says, "Somebody is going to succeed...why not you?" You can experience real joy, fulfillment, and success by following God's path to your dreams!

The Teacher of Cheops-Albert Salvad 2012-05-01 Winner of the NESTOR LUJÁN HISTORICAL NOVEL PRIZE."I was nervous about this book. Finding a good novel in translation from the tiny state of Andorra, nestling in the Pyrenees between Spain and France, was always going to be tricky... I was in for a pleasant surprise... Salvadó has certainly done his homework: the book is painstakingly researched... By and large, the level of detail and historical knowledge is well-handled... The text itself felt professional and slick... this is a highly readable light novel... powerful flashes of insight into human greed, pride and ambition..." (ANN MORGAN, Andorra: Buried treasure, A Year of Reading the Word, <http://ayearofreadingtheworld.com/2012/02/22/andorra-buried-treasure/>, London, february 22, 2012)This is the history of the time of Pharaoh Snefru

and Queen Hetepheres, the parents of Cheops, who built the largest and most impressive pyramid of all. It is also the story of Sedum, a slave who became Cheops' teacher, the high priest Ramosi, and how the first pyramid came to be built. Sebekhotep, the great wise man of that time, said, "Everything is written in the stars. Most of us live our lives unaware of it. Some can read the stars and see their destiny. But very few people learn to write in the stars and change their destiny." Ramosi and Sedum learned to write in them and tried to change their destinies, but fortune treated them very differently. This is a tale of the confrontation between two men's intelligence: one fighting for power, the other struggling for freedom. Other critics' opinions: "It is a long time since a prize was so justly awarded. THE TEACHER OF CHEOPS deserves every honour... An intrigue that develops at a good pace without causing anxiety... A restrained and inspired piece of writing; an outstanding, intelligent and well-constructed novel." (RAMÓN VENTURA, El Periódico) "Salvadó develops the mystery with great skill in his novel." (JACINTO ANTÓN, El País) "Salvadó presents a story about power and knowledge through a fast-paced plot combining intrigue, love, mystery, murder and adventure." (ROSA M^a PIÑOL, La Vanguardia) "Albert Salvadó displays seasoned writing skill in this novel... A very well-organised plot... A straightforward, effective style that is a pleasure to read... He achieves accuracy in his writing." (IGNASI ARAGAY, Avui)

The Story of Western Furniture-Phyllis Bennett Oates 1998-05-01 As well as fulfilling a functional need, furniture has always been an index of status. From the throne of Tutankhamen or the bed of State of Louis XIV to the austere Shaker chest or the Charles Eames chair and later modern pieces from Europe, the Far East and the United States, the style of each piece tells much about the outlook of the makers and the needs and skills of the time. This absorbing history traces the development of furniture design and production, from the days of ancient Egypt to the present, describing what articles were made in each period, how they were made, and what were the social and economic conditions that affected style and finish. The author discusses techniques such as joinery, turning, veneering, marquetry, polishing, upholstery, bentwood work and lamination. Many examples are shown in the illustrations, which are invaluable recognition sources and a lively visual accompaniment to the text.

Desire and Disaster in New Orleans-Lynnell L. Thomas 2014-07-30 Most of the narratives packaged for New Orleans's many tourists cultivate a desire for black culture—jazz, cuisine, dance—while simultaneously targeting black people and their communities as sources and sites of political, social, and natural disaster. In this timely book, the Americanist and New Orleans native Lynnell L. Thomas delves into the relationship between tourism, cultural production, and racial politics. She carefully interprets the racial narratives embedded in tourism websites, travel guides, business periodicals, and newspapers; the thoughts of tour guides and owners; and the stories told on bus and walking tours as they were conducted both before and after Katrina. She describes how, with varying degrees of

success, African American tour guides, tour owners, and tourism industry officials have used their own black heritage tours and tourism-focused businesses to challenge exclusionary tourist representations. Taking readers from the Lower Ninth Ward to the White House, Thomas highlights the ways that popular culture and public policy converge to create a mythology of racial harmony that masks a long history of racial inequality and structural inequity.
