Autour du bassin d'Arcachon à pied-FFRP 2019-04-04 Dominé par la masse imposante de la dune du Pilat, le Bassin d'Arcachon est une véritable petite mer intérieure soumise aux marées. La confrontation constante entre océan, vent, sable, eau douce et eau salée a créé un monde à part qui bénéficie d'un microclimat particulier. Ces conditions remarquables ont permis l'implantation d'une flore et d'une faune variée, notamment de quelque 300 espèces d'oiseaux nicheurs ou migrateurs. L'essor du Bassin est dû avant tout à la mode des bains de mer au XIXe siècle qui fera des villas d'Arcachon une destination prestigieuse.

A Shifting Shore-Alice Garner 2018-07-05 How does tourism transform fishing communities into vibrant resorts, working shores into bathing beaches? In A Shifting Shore, Alice Garner traces the ways fisherfolk, bathers, investors, and engineers understood, claimed, and remade the shores of the Bassin d'Arcachon, a prime fishing and oyster-farming site in southwestern France, over the nineteenth and twentieth centuries. Garner's interest in the coastline—a zone that resists all attempts at definition—shapes this generously illustrated book. Rather than taking a straightforward chronological approach to the settlement and evolution of the towns of Arcachon and La Teste, Garner investigates the development of the Bassin d'Arcachon's southern shores with the aim of recovering something of the "lived space" experienced by locals and visitors. Drawing on guidebooks, newspapers, bylaws, engineers' reports, medical pamphlets, postcards, and the accounts of literary-minded holidaymakers, Garner shows how investors and developers transformed Arcachon and its community—beaches were rezoned and jetties constructed to favor bathers, and a new railway line brought ever-increasing numbers of visitors to the area. She explores how fishermen and women resisted developments that threatened their livelihood or their particular sense of belonging, and shows how they adapted to the changing environment and to their new roles as guides and entertainers. A Shifting Shore, while anchored in Arcachon and La Teste, has much to contribute to a nuanced understanding of relations between hosts and guests in any community.

Coastal Lagoon Eutrophication and ANaerobic Processes (C.L.E.AN.)-Pierre Caumette 2012-12-06 This multidisciplinary volume comprehensively reviews our current knowledge of the effects of urban, industrial and agricultural pollution on the biology of shallow coastal marine lagoons. All the authors are internationally recognized authorities and have had many years of experience in their respective fields. The major strength of this volume is that it integrates several fields of research including biogeochemistry, marine microbiology, marine algology and marine zoology. By adopting such a strategy the reader is provided with a clear insight of the key processes involved in lagoon eutrophication and dystrophy and their impact on the different biological communities which live in such environments. This book will therefore provide an essential reference work for environmental biologists, ecologists, microbiologists and those involved in the management and commercial exploitation of

these economically important ecosystems.
