A Shifting Shore-Alice Garner 2018-07-05 How

does tourism transform fishing communities into vibrant resorts, working shores into bathing beaches? In A Shifting Shore, Alice Garner traces the ways fisherfolk, bathers, investors, and engineers understood, claimed, and remade the shores of the Bassin d'Arcachon, a prime fishing and oyster-farming site in southwestern France,

over the nineteenth and twentieth centuries. Garner's interest in the coastline—a zone that resists all attempts at definition—shapes this generously illustrated book. Rather than taking a straightforward chronological approach to the settlement and evolution of the towns of Arcachon and La Teste, Garner investigates the development of the Bassin d'Arcachon's southern shores with the aim of recovering something of the "lived space" experienced by locals and visitors. Drawing on guidebooks, newspapers, bylaws, engineers' reports, medical pamphlets, postcards, and the accounts of literary-minded holidaymakers, Garner shows how investors and developers transformed Arcachon and its community—beaches were rezoned and jetties constructed to favor bathers, and a new railway line brought ever-increasing numbers of visitors to the area. She explores how fishermen and women resisted developments that threatened their livelihood or their particular sense of belonging, and shows how they adapted to the changing environment and to their new roles as guides and entertainers. *A Shifting Shore*, while

anchored in Arcachon and La Teste, has much to contribute to a nuanced understanding of relations between hosts and guests in any community.

Autour du bassin d'Arcachon à pied-FFRP 2019-04-04 Dominé par la masse imposante de la dune du Pilat, le Bassin d'Arcachon est une véritable petite mer intérieure soumise aux marées. La confrontation constante entre océan, vent, sable, eau douce et eau salée a créé un monde à part qui bénéficie d'un microclimat particulier. Ces conditions remarquables ont permis l'implantation d'une flore et d'une faune variée, notamment de quelque 300 espèces d'oiseaux nicheurs ou migrateurs. L'essor du Bassin est dû avant tout à la mode des bains de mer au XIXe siècle qui fera des villas d'Arcachon une destination prestigieuse.

Coastal Lagoon Eutrophication and Anaerobic  
Processes (C.L.E.A.N.)-Pierre Caumette  
2012-12-06 This multidisciplinary volume  
comprehensively reviews our current knowledge

of the effects of urban, industrial and agricultural  
pollution on the biology of shallow coastal marine  
lagoons. All the authors are internationally  
recognized authorities and have had many years  
of experience in their respective fields. The major  
strength of this volume is that it integrates  
several fields of research including  
biogeochemistry, marine microbiology, marine  
algology and marine zoology. By adopting such a  
strategy the reader is provided with a clear  
insight of the key processes involved in lagoon  
eutrophication and dystrophy and their impact on  
the different biological communities which live in  
such environments. This book will therefore  
provide an essential reference work for  
environmental biologists, ecologists,  
microbiologists and those involved in the  
management and commercial exploitation of  
these economically important ecosystems.
